

Plot Attributes ackleyFunctDummyCase

January 16, 2020

Statistics for ackleyFunctDummyCase attributes.

We are imposing a ChiSquared cut at a upper bound of :20.52

The following are the attributes that go into the making of the plot **res1-res2-extTest**:

The following have a contribution to χ_G^2 corresponding to:

$f_{Ac}(x, y)$ with test mean, experimental StdDev, and theoretical StdDev:

- $f_{Ac}(x, y)$ Test Mean : 0
- $f_{Ac}(x, y)$ Expedimental Standard deviation : 0.5
- $f_{Ac}(x, y)$ Theoretical Standard deviation : 0.5

The following have a hard cut corresponding to:
